

The LifeSize[®] Desktop[™]

MOBILE WORKFORCE SOLUTION with Multiparty Calling IT-Friendly, Enterprise-Ready HD Video Communications

WHO NEEDS IT?

Any organization that:

- Supports geographically dispersed workers
- Maintains a large group of mobile employees and telecommuters
- Requires frequent collaboration among workers in different locations
- Uses multiparty conferencing to enhance communications

WHAT PROBLEMS DOES IT SOLVE?

Broad Deployment: Ability to connect workers from any location in high definition video

Corporate Firewall Traversal: Efficiently and seamlessly connects users through company NAT/firewalls

Large, Dispersed Systems: Manages, monitors and tracks video systems and multiple LifeSize Desktops from one centralized location

Existing Equipment: Standards-based and interoperable

Shrinking Budgets: Affordable one-time purchase, no additional infrastructure required, reduced travel costs

Multiple Sites Need to Communicate Simultaneously: Enables up to 16 participants on a single call

Now you can deploy, secure and manage HD video communications throughout the enterprise.

LifeSize offers a seamless solution for secure multiparty video calling for large and growing organizations. This fully integrated solution helps people connect, collaborate and share data using high definition video with efficient firewall traversal and a centralized management system.

Broad Enterprise Deployment to Any PC

Extend high definition multiparty video communications to remote employees, teleworkers and external partners and collaborators working on a PC with Internet access. An intuitive interface offers easy click-and-go access to ensure fast adoption.

Efficient NAT and Firewall Traversal

Gain secure NAT/firewall traversal, enabling video calls within and across organizations without compromising IP security. A built-in SIP registrar maintains name-based dialing, thus encouraging broad, consistent use.

Fully Integrated Management

Monitor and push configuration settings and directories to users from a centralized web-based management interface. Administrators can proactively manage bandwidth and other video settings for each individual computer to maintain an optimized user experience.

Multiparty Conferencing

Scale your video network intelligently, enabling HD multiparty conferencing, with up to 16 participants, for improved collaboration throughout the organization.

Key Features

Immersive video communications

- ▶ 720p30 HD transmit and receive
- ▶ Data sharing/dual video
- ▶ Multiparty calling, up to 16 ports

Easy to use

- ▶ Simple dialing plan and directory structure
- ▶ Click to call support from e-mail or web link
- ▶ Built in name-based dialing and SIP registrar
- ▶ Web-based user interface

Simple, broad deployment and management

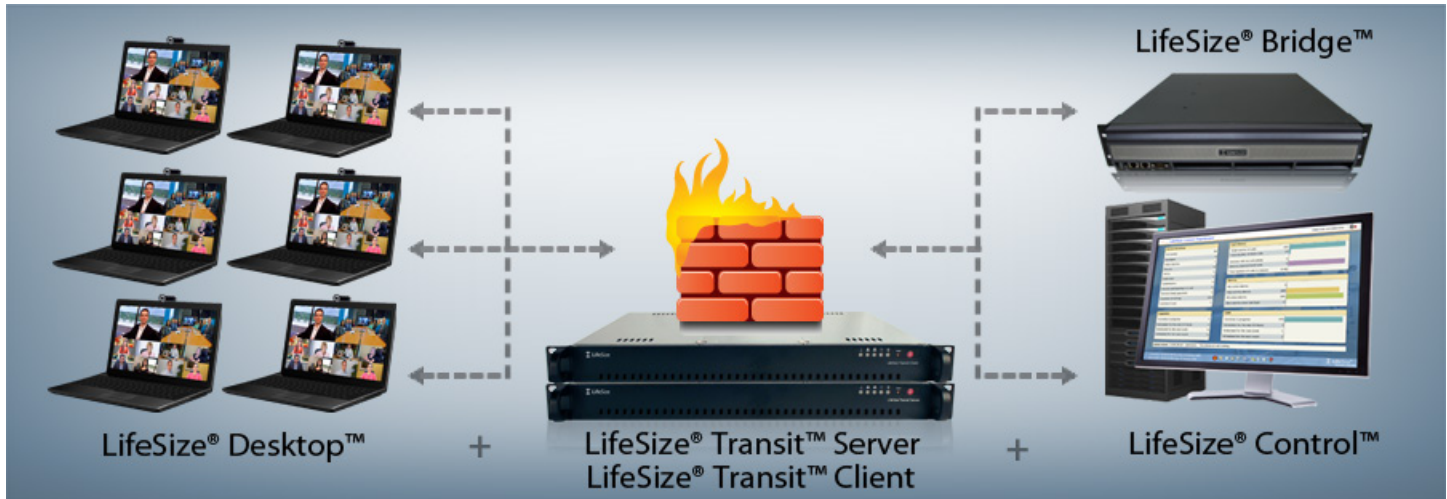

- ▶ Scalable deployment
- ▶ Central configuration and management
- ▶ Easy handling of large bandwidth demands
- ▶ Monitoring of network health and system alerts

Highly flexible and secure

- ▶ Integrated encryption
- ▶ Firewall traversal to protect corporate network
- ▶ Confidence that video calls will connect from any location

MOBILE WORKFORCE SOLUTION with Multiparty Calling

Work securely and productively from anywhere through easy-to-use PC-based HD video communications

IT-Friendly, Enterprise-Ready HD Video Communications

LifeSize® Desktop™ (Version 2.0 or later)

Key Product Benefits and Features

HD Video and Audio

Clear 720p30 receive at 1Mbps and 720p30 transmit with advanced wideband audio

Data Sharing

Share your PC screen for improved collaboration

16:9 Layout

Send and receive video in 16:9 formats to seamlessly fit your HD room systems

Scalable

Provisioning and administration model from one to thousands of seats

Asymmetric Bandwidth

Optimizes both send and receive video quality

Standards-Based

Interoperable with SIP-based endpoints and infrastructure

Easy to Use

Intuitive and familiar user interface

LifeSize® Transit™ Server LifeSize® Transit™ Client (Version 3.0 or later)

Key Product Benefits and Features

Full HD Security

Up to 20 simultaneous Lifesize Desktop calls through the firewall per LifeSize Transit

Multiprotocol Support

H.323: H.460.18, H.460.19

SIP: STUN, TURN, ICE UDP, TCP, HTTPS

Fewer Ports, Less Risk

Smallest set of ports for SIP and H.323 traversal on the market

Easy Dialing

URI addressing with DNS resolution and SIP registrar dialing

Scalability

Clustering support to scale additional dial plans via SIP registrar

Firewall Integration

Deploy in the DMZ or outside the firewall

Embedded Registrar for Directory Services

Support for 500 registered users

SIP-based URI addressing with DNS resolution

LifeSize® Control™ (Version 5.0 or later)

Key Product Benefits and Features

Real-Time Management

Dashboard homepage provides access to critical information and improves management effectiveness

Configuration Management

Maintains templates to modify LifeSize Desktop settings, on demand or scheduled, for groups or individual instances of LifeSize Desktop

Access Management

Lock down or allow access to LifeSize Desktop settings on an individual basis

Directory Integration

Quick contact lookups keep your employees connected between Lifesize Desktop and video systems

Secure

Standards-based access methods and end-to-end encryption

LifeSize® Bridge™

Key Product Benefits and Features

Capacity & Video Resolution

16 participants flat capacity

Audio and video share 16 ports, up to 16 participants at any resolution, frame rate, bandwidth
1080p30 through widescreen CIFp30
720p60 through widescreen CIFp60

Advanced Video Processing

30 and 60 frames per second regardless of the number of participants, resolution, codec, or call speed, in the same conference

Flat capacity, maximum conference size up to 16 ports transcoding and rate matching on each port
HD and SD within the same conference

Layouts

12 continuous presence layouts available-

Voice-activated switching with up to 3 main quadrants
Unique layout per participant

DTMF tone and far-end camera control to switch layouts

Automatic layout selection based on the number of participants

User adjustable text positioning to adjust for TV overscan
