POLY STUDIO ROOM KITS FOR MICROSOFT TEAMS ROOMS ON WINDOWS

Take your Teams meetings to the next level. Poly Studio Room kits for Microsoft Teams Rooms offer mind-blowing audio and video for your most productive, focused calls ever. Our kits feature cutting-edge Poly DirectorAI technology that intelligently frames active speakers with pinpoint accuracy, so everyone looks present and has an equal meeting experience. No one will miss a word or inflection with Poly exclusive NoiseBlockAI and Acoustic Fence technologies* that block out distracting sounds. Complete the solution with your choice of enterprise-grade PCs from world-renowned manufacturers Lenovo and Dell.

AT A GLANCE

- Simple, clutter-free design.
- Poly MeetingAI delivers smarter, more equal video meetings.
  - Poly DirectorAI for advanced camera framing and NoiseBlockAI, Acoustic Fence technologies for clear audio.
- Choose the room size kit, then combine it with an enterprise-grade compact conferencing PC from Dell or Lenovo.

DELL OPTIPLEX 7080 XE
WITH INTEL® I5 10TH GENERATION, 8GB RAM

LENOVO THINKSMART CORE
WITH INTEL® I5 11TH GENERATION, 8GB RAM

TARGET BUYERS

IT decision makers, UC specialists, facility managers, or business leaders who purchase or influence buying decisions for collaboration solutions.

CUSTOMER PAIN POINTS

ISSUE	SOLUTION
Too many cables that need to be wired between the room PC and the conference table	Poly GC8 and the room PC connects with just one USB cable. A user's PC connects to the GC8's HDMI port for content sharing. All-in-one video bars eliminates any need for tabletop audio device especially for smaller rooms.
Room participants look too small if they join from medium or large rooms	Poly Studio and Poly Studio E70 cameras support active speaker tracking so remote attendees can see everyone's face clearly.
There's constantly noise from outside the room	Poly Acoustic Fence and NoiseBlockAI minimize distracting sounds automatically, without you having to mute every time.

KEY DIFFERENTIATORS

- Poly DirectorAI intelligently optimizes the room view including group framing or speaker tracking, so everyone is seen clearly.
- Electronic PTZ camera on Poly Studio conferencing cameras with 4K sensor(s) ensure that framing is adjusted accurately and quickly, without any jagged motion. Poly Studio E70 dual lenses ensure a long reach for large meeting rooms.
- Beam-forming microphone array, along with NoiseBlockAI and Acoustic Fence technology removes distracting noises for crystal clear audio.
- Poly Studio Room Kits for Microsoft Teams are designed to be simple to set up and maintain (no separate configuration on the touch controller, or external boxes).
